

## “Keen to be Green” - Posters Available for Your Stores

The last edition of the MGA magazine launched our “Keen to be Green” initiative. We invited members to participate in promoting the reduction of plastic carry bag usage by customers. We pointed out that we did not support charging customers for plastic carry bags rather we preferred to dissuade customers from using them.

We have received an excellent response from members who have downloaded our “Keen to be Green” posters from our website for use in their stores.

We are now progressing further with our Keen to be Green initiatives and we are developing a set of posters that we hope will encourage staff to participate in energy saving practices in your store. The posters are designed to promote simple energy friendly tips that will also result in savings for the business.

A complete range of energy saving posters will be available on the website later this month.

Over the next few months we will be providing information as to the ways in which you can save energy, improve your refrigeration use of power and following simple steps to improve in store lighting.

## Are you ready to take the “Keen to be Green” Challenge?

MGA is seeking stores that would like to participate in the “Climate Ready” Programme.

The Australian Government is offering grants on a matching funding basis to support projects that address the effects of climate change. There are a range of issues that could be addressed including:

- Processes or services to monitor emissions or power usage
- Information systems that compare the carbon footprints of different activities
- Technologies that reduce the energy used by appliances

‘Climate Ready’ supports small to medium businesses and we are seeking a number of stores in each State who would like to participate in the programme. If you are interested please contact MGA Workplace Relations team on 1800 888 479.
